SUMMARY

Graduated as the valedictorian of the Computer Engineering department and currently pursuing a thesis-based Master's degree in Computer Engineering. Focused on developing LLM applications, RAG systems, and AI agents. Experienced in building AI applications with LangChain, LangGraph, and CrewAI, as well as backend development and deployment using FastAPI, Docker, Nginx, and AWS EC2.

Achievements & Activities

- TEKNOFEST 2026 — **2nd Place in Turkey**
  University Students Research Projects Competition, Education Category
  Project: BrailleVision — Intelligent Educational Support System for Visually Impaired Individuals

- 320+ LeetCode Problems Solved
  Solved 320+ problems on LeetCode using C++ and Python, with a focus on algorithms and data structures.
  Profile: leetcode.com/u/Muhammet_said/

EDUCATİON

- **Computer Engineering,** Master's Degree | Karadeniz Technical University | 2026 – Present

- **Computer Engineering |** Malatya Turgut Özal University **|** 2026
  GPA: 3.66/4.00 | **Ranked 1st in the Department, 3rd in the Faculty of Engineering**

EXPERİENCE

- **Software Development Intern |** Aiksir Yazılım **| Oct 2024 - May 2026**
  - Developed LLM-powered applications, RAG systems, and customizable chatbot solutions.
  - Built and integrated AI workflows using LangChain, LangGraph, and CrewAI, with FastAPI-based backend services and React/Flutter interfaces.
  - Deployed and maintained applications using Docker, Nginx, and AWS EC2, gaining hands-on experience in server configuration and deployment.

- **Instructor Mentor |** T3 Foundation **| Jan 2025 - Jul 2026**
  - Mentored participants in software development, project development, and technical problem-solving processes.
  - Provided technical guidance and supported participants in implementing and developing their projects.

PROJECTS

- **Thelmam - Religious Q&A Mobile Application**
  Flutter, FastAPI, LangChain, LangGraph, CrewAI, Vector Database, Firebase, Docker, Nginx, AWS EC2
  - Developed a RAG-based mobile application that provides question-answering based on tafsir, fiqh, and religious sources.
  - Took end-to-end responsibility for the mobile interface, backend API, AI workflow, vector database integration, and deployment.
  - The application is currently in the Google Play publishing process.

- **Customizable RAG-Based Chatbot System**
  LangChain, FastAPI, React, Vector Database, AnythingLLM
  - Developed a RAG-based system that enables companies to upload their own documents and create website-specific chatbots.

    - Designed document processing, embedding generation, vector database integration, retrieval, and source-grounded response generation workflows.

- **Nexora Math - Math Puzzle Game**
    - Developed a mobile puzzle game focused on mathematical thinking and problem-solving.
    - Published the application on Google Play and achieved 100+ downloads.
    - **play.google.com/store/apps/details?id=com.nexoramath.app**

SKILLS & LANGUAGES

- **Languages:** Arabic (Native), Turkish (Advanced), English (A2)
- **Programming:** Python, C++, SQL
- **AI & LLM:** LangChain, LangGraph, CrewAI, RAG, Vector Databases
- **Backend & Web:** FastAPI, React
- **Mobile:** Flutter
- **Cloud & DevOps:** Docker, Nginx, AWS EC2, Firebase
- **Databases & Tools:** MySQL, PostgreSQL, Alembic, Git
